CROWN 
RELOCATIONS

Care and coordination are the characteristics of our service

Every relocation needs someone to be in control of all the details, and to offer personal advice and support throughout journey.

In hundreds of locations in nearly 60 countries, our experienced people provide the quality of service that gives confidence – helping you enjoy the excitement of relocating rather than worrying about the details.

Supporting you or the whole family

Whether you're going it alone or shipping everyone along, Crown Relocations can help.

Children need extra care on a relocation as the emotional roller-coaster can be especially hard for them to ride.

If you're relocating independently you need different but no less detailed support, particularly as there's no one else to organise things for you.

Our experienced people understand the difficulties of making a big break – many of our employees are themselves expatriates. They'll understand your needs and the challenges of relocating you, your partner, your family...and even your pets.

Getting to know the place

You can't beat a bit of inside information. We tailor preview trips so you can be introduced to the destination by someone who knows it as only a local can.

If you don't want to go the distance, speak to our destination team and ask them anything you like.

Their knowledge of living and working in their locations is as inexhaustible as their enthusiasm.

Making plans and settling-in

With local knowledge of everything from housing and education to visas and driving licenses, our destination teams will get you settled quickly:

Home search

We can advise on residential areas, community facilities, medical options, entertainment and safety.

Education

We'll help you find the best and most suitable schools for your children, and handle the applications process – often needed well in advance.

Partner support

If only one of you is working, we can support your partner with options for local employment, training, or voluntary work.

Intercultural training

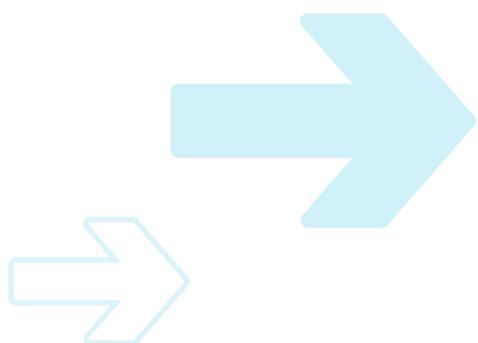

Gaining confidence from learning how to communicate, and the satisfaction of integrating into the local culture, is undoubtedly the source of a truly rewarding experience. Our training programs help you with business skills and social integration vital for a successful relocation.

Immigration

Local laws change frequently, so it helps to stay in touch with visa requirements to ensure your stay is untroubled.

The first five minutes

The sudden realisation that everything here works differently can be a challenge. We'll take care of organising basic utilities, advising on banking, driving licenses, insurance services and local registrations. If you need a maid or handyman, we can set that up, too.

Pre-move get planning

A detailed, in-home consultation ensures we understand your needs, and carefully record the amount and requirements for your cargo.

We'll help explain the process, complete the documentation and offer advice on how best to plan your move.

Moving day – careful and courteous, that's the Crown crew

Highly trained people pack everything with care, using colour-coded labels for easy identification at destination.

Everything packed is recorded on inventory.

And safely loaded for the journey.

Transit – with you all the way

Whether by road, sea or air, your belongings are tracked all the way. You can even track it yourself online.

Want to store some items? Crown operates secure storage facilities at origin and destination.

Arrival – Crown will be there to welcome you

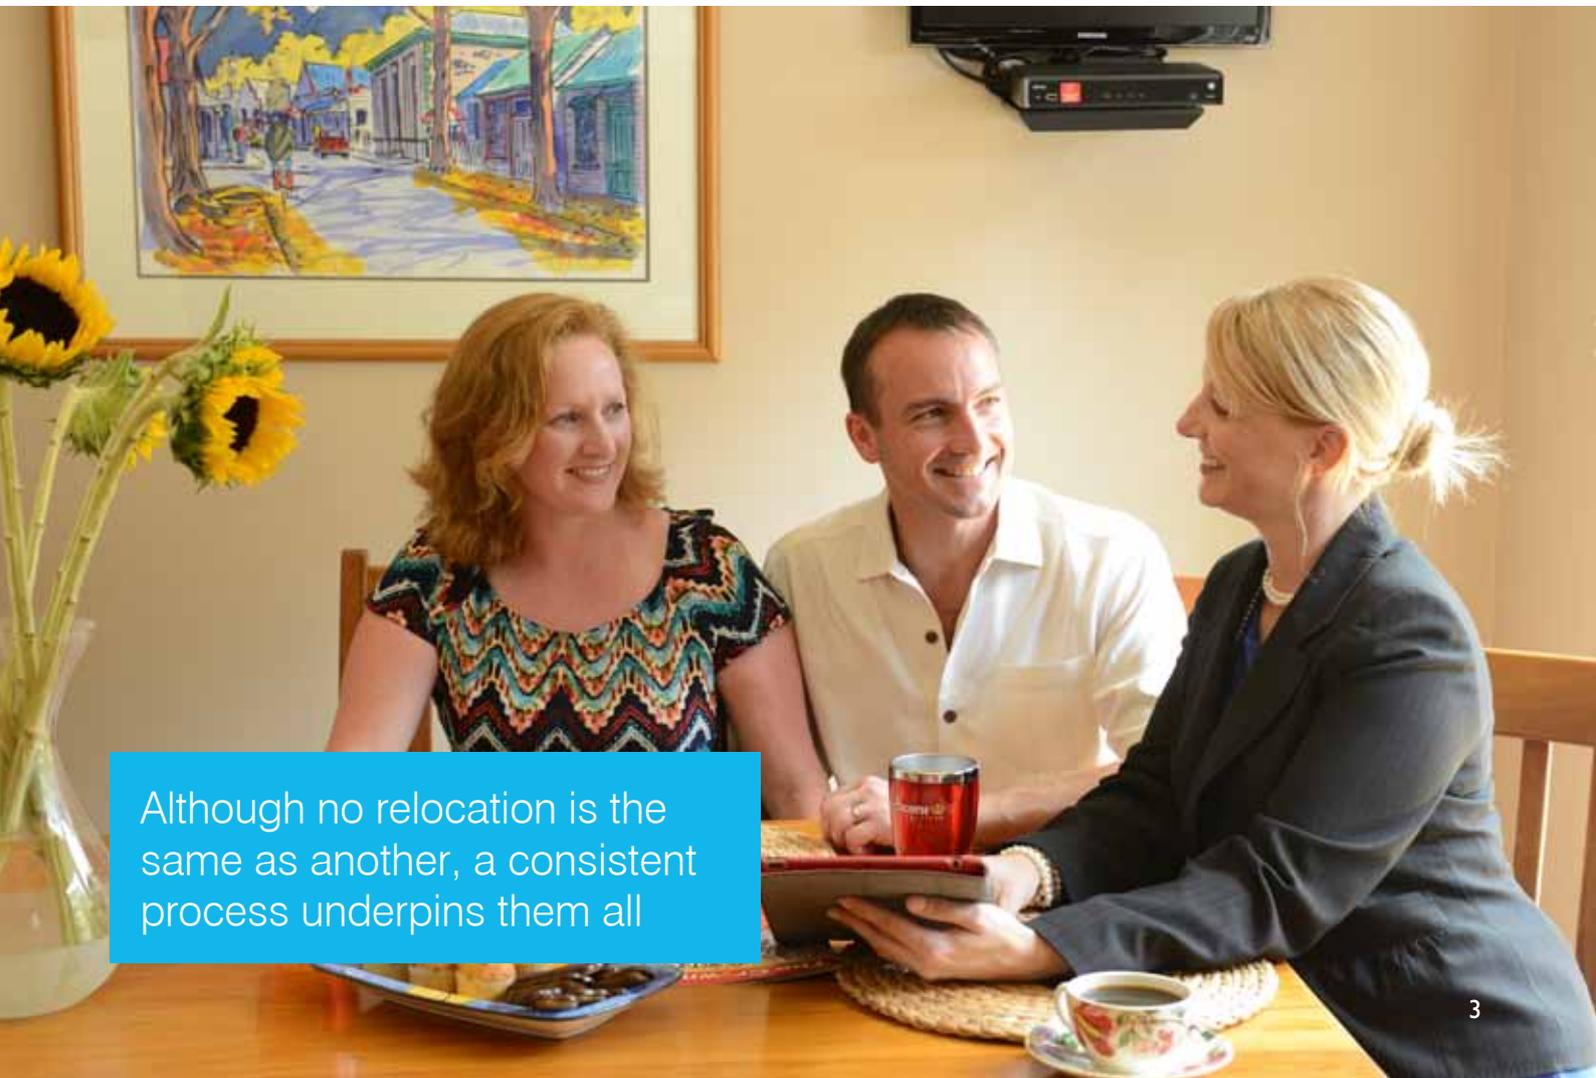

We handle all the necessary customs formalities.

We deliver and unpack all your belongings.

And we remove used packaging and recycle all we can.

All our Move Managers agree, preparation is the secret of relocation success. Find out as much as you can in advance and organise as much as possible, early on.

You can find more advice and useful information to help you plan on our website: www.crownrelo.com

Although no relocation is the same as another, a consistent process underpins them all

Local knowledge: Crown Relocations has expertise on the ground in almost 60 countries

Since 1965 we've been introducing people to new places and new opportunities worldwide.

We provide detailed advice and services for individuals and families emigrating or relocating for employment assignments all over the world.

Our services encompass everything needed to plan, move, and settle into somewhere new, however unfamiliar the place or the culture.

Although we're a global business we maintain local connections

When you're active in so many countries, you get to see a lot of inequality and adverse conditions.

As a private company we can have a positive influence on our communities, as well as reduce our impact on the environment. Here's how:

- Reducing our carbon footprint by making efficiencies across our global operations
- Energy efficiency targets for buildings and transport
- Staff engagement in fundraising and donating time and money to local causes

We hope your experience of relocating is as exciting and rewarding as possible.
